

the data pack starting at square one

what's the data pack

- Excel-based targeting tool designed to help PEPFAR teams set targets in line with the 90-90-90 goals
- data packs are pre-populated with FY16 results, FY17 targets, PLHIV estimates, and assumptions for a series of key indicators, mostly along the clinical cascade

TB positivity

HTS adult targets

in order to get psnu targets down to the IM level, the data pack takes the IM (and dedup) distribution from the previous year results and multiplies it by the new targets

ALLOCATION BY IM					FY16 APR Distribution

a peak into the IM distribution tab

pepfarlandia

allocation by IM

let's assume we're working in pefarlandia

pepfarlandia

allocation by IM

which has six districts

pepfarlandia

allocation by IM

and four distinct IMs

pepfarlandia

allocation by IM

working across the country

pepfarlandia

allocation by IM

district e			
snu target	im	results distribution	im target
200 tests		100%	200 tests
		100%	200 tests

pepfarlandia

allocation by IM

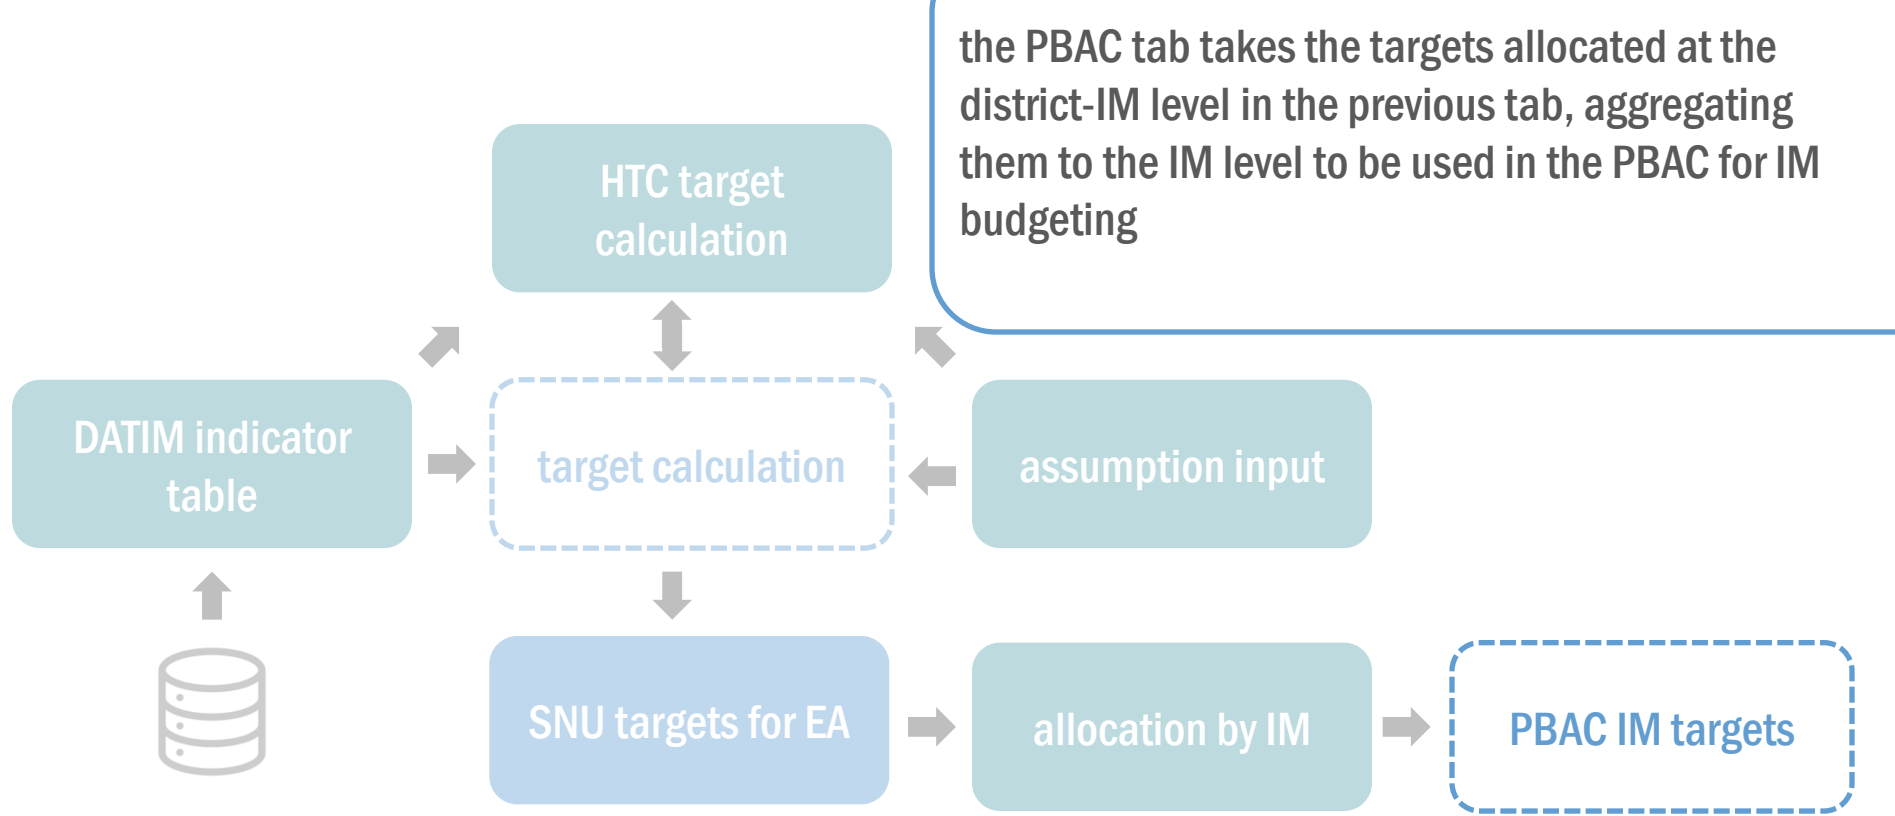

district b			
snu target	im	results distribution	im target
800 tests		70%	560 tests
		30%	240 tests
		100%	800 tests

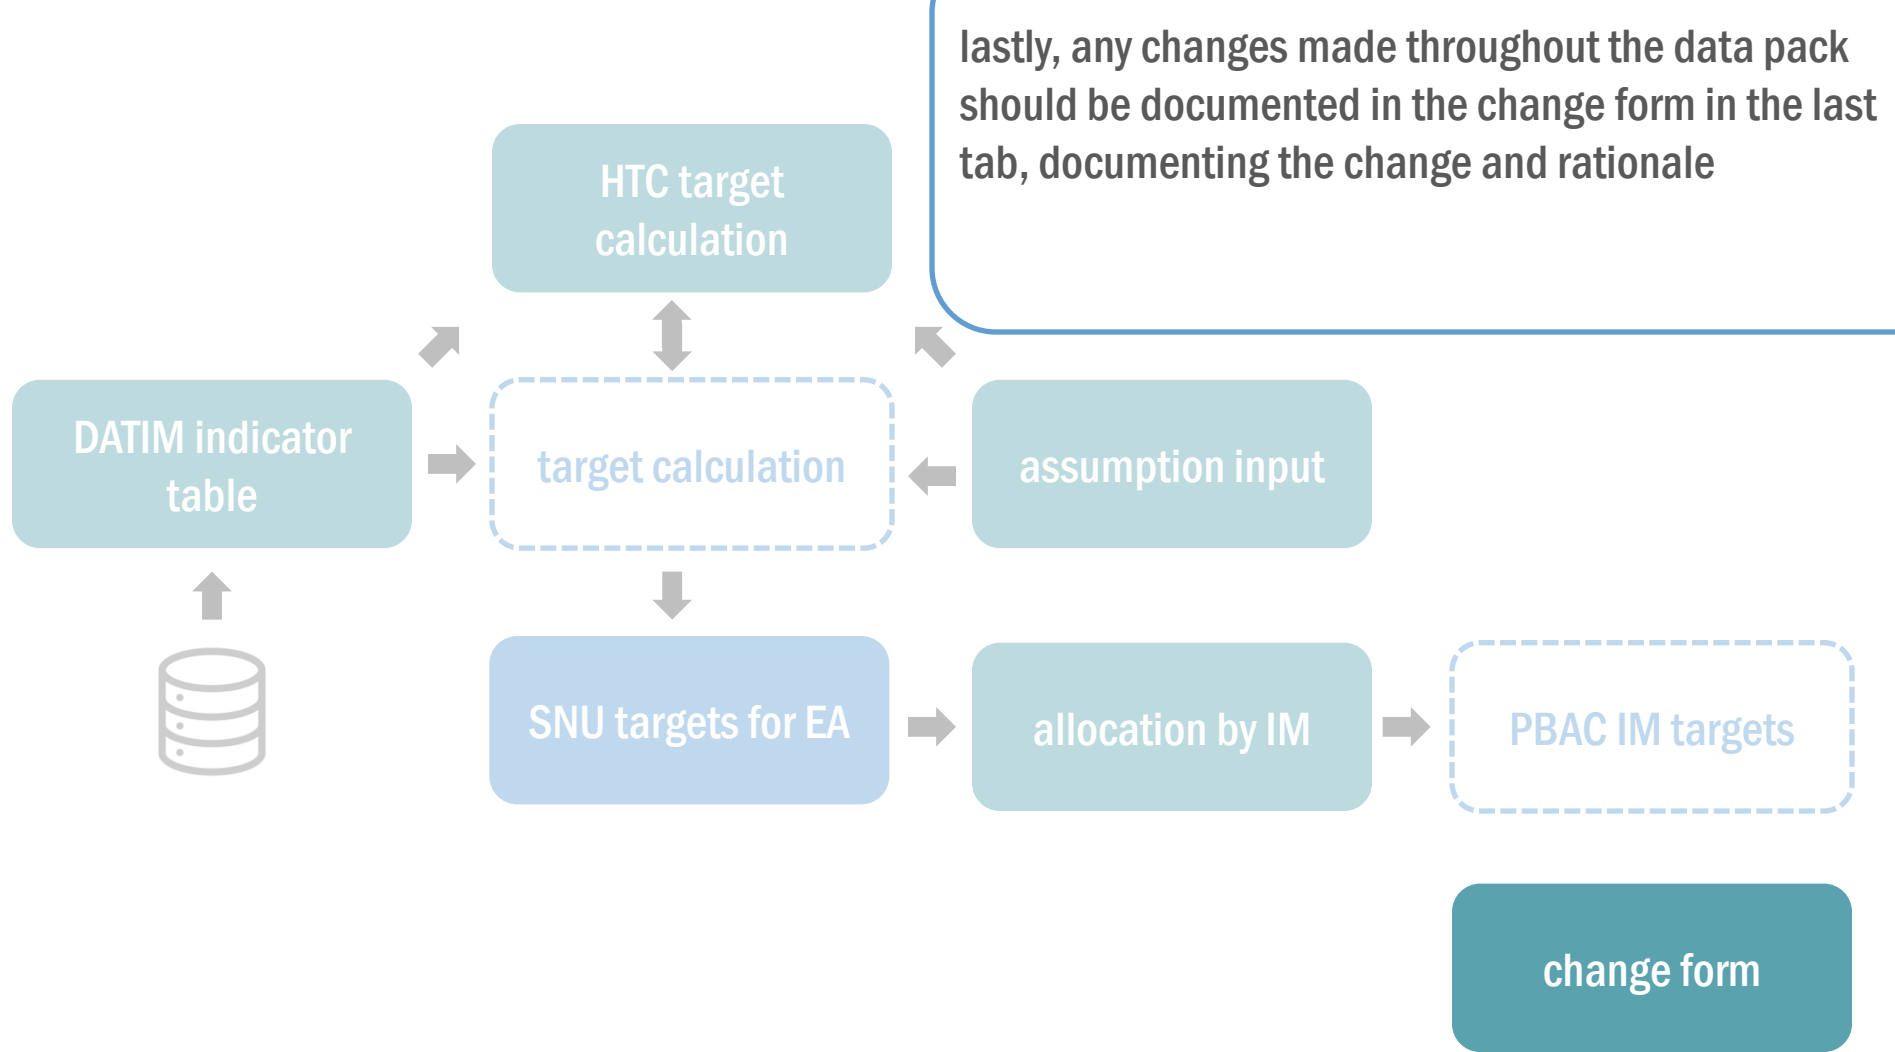

pepfarlandia

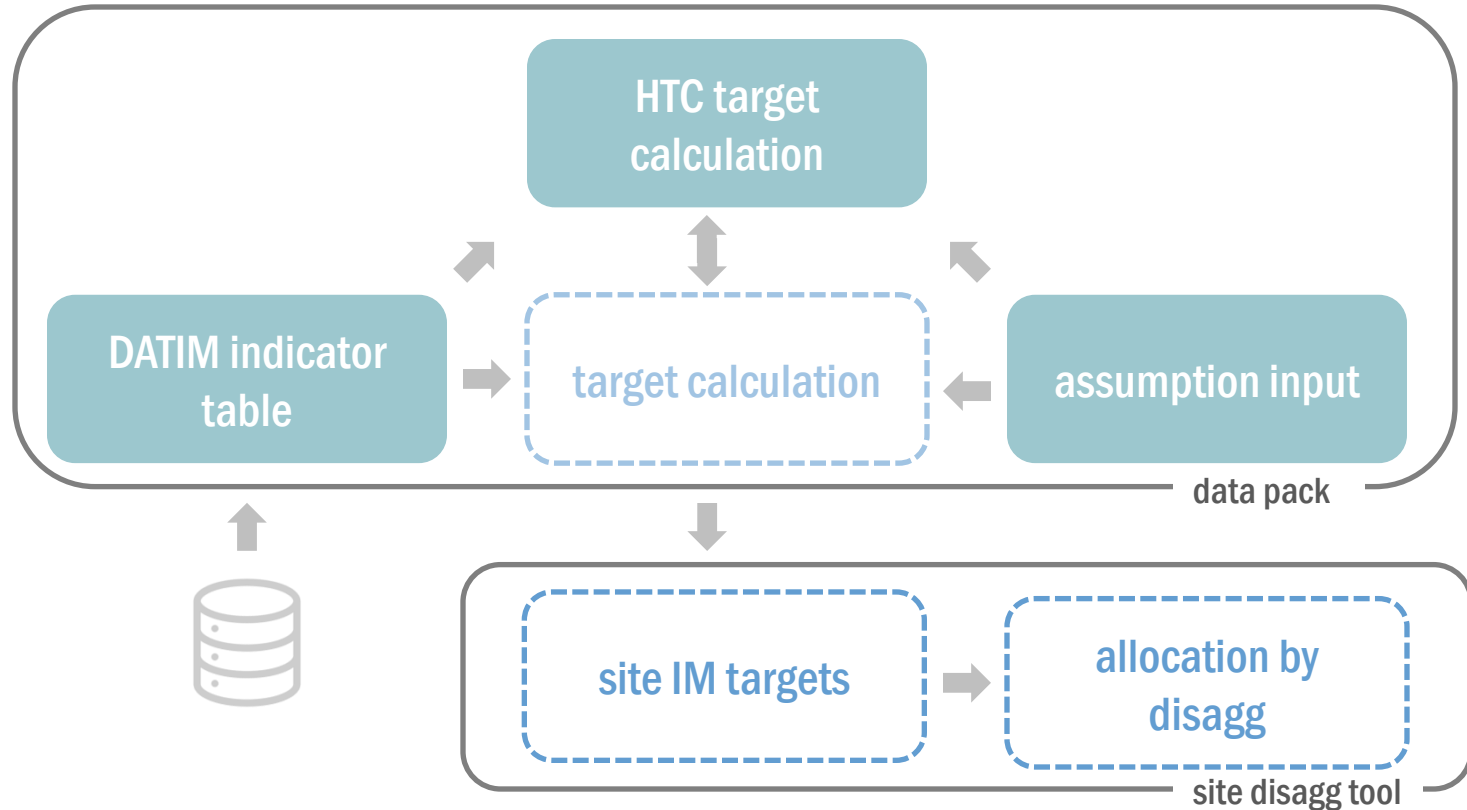

allocation by IM

district b			
snu target	im	results distribution	im target
800 tests		70%	560 tests
		40%	320 tests
		-10%	-80 tests
		100%	800 tests

site disagg targeting

pepfarlandia

	mobile		
	VCT	70%	112
		100%	160

considerations

- ease of use/user experience
- underlying purpose
- time v. effort for country team, HQ, and partners
- feasibility
- nimbleness v. rigidity

the end
