# A More Perfect Union

The Highlander Script provides the user the benefit of a dataset where coarse and fine age bands can be combined together without fear of double counting results. The figure below shows how the age/sex groups compare in South Africa between what is in the Fact View dataset, coarse and fine, against the combined output in the highlander

**South Africa, FY16 Cumulative**

| | | Female | Male |
|---|---|---|---|
| **<15** | Coarse | 156,786 | 140,807 |
| | Fine | 120,556 | 131,460 |
| | Highlander | 110,397 | 101,764 |
| **15+** | Coarse | 2,298,175 | 1,438,175 |
| | Fine | 110,397 | 101,764 |
| | Highlander | 1,290,667 | 846,810 |
